SØKTAS

CORAL DOME
PENDANT

Designed and Handmade by Oliver Höglund & Ryan Roberts

Infuse a touch of elegance into your surroundings with the Coral Dome pendant light. The unique dome configuration metamorphoses this pendant into a contemporary masterpiece, meticulously designed to enrich dining areas, bedrooms, and upscale office settings. Featuring a hand-blown glass shade and a steel dome in options of matte black, brass finish, steel finish, matte white, or medium bronze finishes, this pendant provides the perfect ambience through your preference of warm or warm white LED temperatures. Meticulously hand-blown using premium Swedish clear glass, each disc carries the distinctiveness of SOKTAS Glass designs, promising an unparalleled and personalised lighting masterpiece that adds both elegance and character to your space.
Hand Made in Currumbin, Australia.

MOUNTING

Installation Instructions

1. Prep the ceiling with an approx. 50mm hole to fit the transformer. Place the transformer in the ceiling and feed the cable through the hole into the room. Connect the single electrified cable to the transformer.

2. Screw the steel mounting plate to the ceiling using appropriate fasteners for the ceiling substrate.

3. Secure the magnetic cover plate onto the mounting plate.

   *Push up the metal cable gripper on the mounting plate to adjust the cable length.
