Wall Bracket
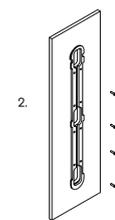

## MOUNTING

Installation Instructions

1. Prep the wall with 3 holes to match the wall plate cutouts. Secure the transformer into the wall cavity and feed the cable through the hole into the room. Connect the single electrified cable to the transformer.

*The transformer needs to be accessible for maintenance purposes.

2. Screw the mounting plate to the wall using appropriate fasteners for the wall substrate.

3. Fit the face plate (with attached lights) over the mounting plate and secure with the supplied M3 grub screw at the bottom of the plate.

M3 Grub Screw
