

CORAL TRIO WALL LIGHT INSTALLATION

Installation Instructions

Unscrew the grub screw to separate the screw plate from the face plate.

Prep the wall with a hole to match the cutout in the screw plate.

Install the screw plate to the wall using appropriate fasteners for the wall substrate.

Secure the transformer into the wall cavity and feed the cable through the hole into the room. Connect the single electrified cable to the transformer.

*The transformer needs to be accessible for maintenance purposes.

Fit the face plate over the mounting plate and secure with the supplied M4 grub screw at the bottom of the plate.

Glass Installation

To install the glass piece, hold the glass against the LED housing and thread the 30mm threaded cap into the LED housing.

*Ensure the rubber o-rings are installed in the correct position. If the glass is not held firmly when the threaded cap is fully screwed in, install the second o-ring behind the glass.
